Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 6-11, drawn to a fluid processing set, classified in class 210, subclass 257.1.
 - II. Claims 24-38, drawn to a fluid processing set, classified in class 210, subclass 202.
-

The inventions are independent and distinct from one another because the fluid processing set of Group I does not require the **means for removing** excess photochemical agent and/or photoactivation by-products of Group II, and the fluid processing set of Group II does not require the **holder** for receiving and temporarily holding the container of the second portion during a processing step of Group I, as evidenced by claims 1 and 24. Also, the fluid processing set of Group I does not require a second container which is **integrally connected** to the first container, and the fluid processing set of Group II does not require the **tubing** of Group I, as further evidenced by claims 1 and 24.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not
